

Stephen Brundage

Orlando, FL | (908) 914-2699 | stephen.brundage12@gmail.com | stevebrundage.com

Education	University of Central Florida <i>Bachelor of Science in Computer Science</i>	Orlando, FL May 2020
Skills	Programming: Swift, SwiftUI, Objective-C, JS, Bash, Ruby Technologies: Xcode, Swift PM, Claude / Copilot, GitHub Actions, DevCycle, Git, Postman, Proxyman	
Experience	Royal Bank of Canada <i>Senior Mobile Software Engineer, iOS</i>	Orlando, FL Aug 2022 – Present
	○ Led the architectural design and hands-on development of a ground-up rewrite of RBC’s innovation app, RBC Launch, creating a modular, scalable system with feature-flag and A/B testing capabilities ○ Served as technical lead and primary developer for multiple Swift Packages, establishing team-wide architecture standards that emphasized modularity and flexibility, with high code coverage enforced through Swift Testing ○ Developed a POC using Apple's Foundation Models to determine user search intent, paired with an embedding model to extract merchant and category context before fetching targeted offers ○ Utilized the latest Swift 6 and SwiftUI features, adopting modern @Observable patterns and structured concurrency to build responsive, efficient, and maintainable UI ○ Managed a 4-person iOS team, improving development practices, enforcing coding standards, and automating workflows to save developer time ○ Researched, developed, and presented POCs using frameworks such as ARKit, Vision, HealthKit, and AppClips to senior leadership during demo days, initiating new development streams ○ Mentored a junior developer, providing guidance on best practices, leading to their successful transition into a full-time iOS developer role ○ Established streamlined Git workflows, reduced merge conflicts and improved collaboration across teams ○ Implemented automated CI/CD pipelines using GitHub Actions to streamline testing, linting, and builds ○ Migrated from Cocoapods to SwiftPM, converting 10 mixed-language pods to Swift Packages	
	<i>Mobile Software Engineer, iOS</i>	March 2019 - Aug 2022
	○ Designed and implemented reusable UI components, networking layers, and Swift extensions adopted across multiple teams, accelerating development and standardizing design patterns ○ Prototyped and delivered POC ideas for innovative app features, including an AR Gifting experience using ARKit, collaborating with Design and Product teams to evaluate feasibility and maximize client value ○ Developed adaptive, accessible iOS interfaces with Auto Layout adhering to Human Interface guidelines ○ Utilized test-driven development to ensure expected object functionality ○ Coordinated with developers and QA teams to manage and resolve bug reports ○ Improved app performance by implementing concurrency with GCD and Operations ○ Integrated analytics and event logging using Google Analytics to surface user behavior insights for Product	
	<i>Augmented Reality & iOS Development Intern</i>	Nov 2017 - March 2019
Continuous Learnings	<i>Server-Side Swift Development – Vapor, Fluent, PostgreSQL Foundation Model, ARKit, Vision, HealthKit, and Core Data Frameworks</i>
